ENGLISH AND CHINESE DICTIONARY WITH THE PUNTI AND MANDARIN PRONUNCIATION: An Anglo-Chinese Dictionary, published at the Daily Press Office. Hongkong.

MOR comprehensiveness and practical service this Work stands unrivalled. All the new current rates. words which the Chineso have of late years been compelled to com to express the numerous ob jects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exeroises for students of a most instructive nature. Both the Court and Punti pronunciations are given, the accents being carefully marked on to the extend of £10,000, on Buildings or on the best principle hitherto attained. The typo- Goods stored therein, graphy displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast been ony of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications. To illustrate the vast scope of the work, the following facts are submitted for consideration. Chalmers' Vocabularly contains about 16,000 Chinese characters, and Medhurst's, English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the Fire to the extent of \$40,000, on Buildings, or student of this difficult language absolutely re- on Goods stored therein." quires examples to display the various applications and convelents of different words which have one general meaning. Of these examples this work contains more than five times as many as may other Dictionary hitherto pub- INCOM and after this date, and until further

lished. For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Calmese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted! To parties resident in England and interested in China it cannot but be involvable occasionally.
